

Master of Science in Applied Economics

Create your path to a successful and rewarding career

Why pursue your Master's in Applied Economics at Bryant University?

- ❖ Enhance and apply your expertise in a real-world setting through **integrated experiential learning** (full- or part-time internship aligned with your career path).
- ❖ Elective courses available through **high-touch eLearning (online)**.
- ❖ **Built-in flexibility:** the time required to complete the MSAE depends entirely on your preferred pace.
- ❖ Inspiring faculty with **deep and broad practical experience** in the field.
- ❖ The **Center for Global & Regional Economic Studies** at Bryant University provides additional opportunities to collaborate with faculty, business and government.

The innovative and immersive **Master of Science in Applied Economics (MSAE)** focuses on practical career applications of economics knowledge and expertise.

It will qualify you for employment as an economic researcher, analyst, consultant, and other positions in a wide variety of private and public enterprises.

Be prepared to join a growing and high paying labor market:

- ❖ A recent search on Indeed.com identified thousands of jobs available with a starting salary of \$80,000 or more for individuals with a master's degree in economics.
- ❖ *Forbes* magazine recently listed a Masters in Economics as one of the “Master’s Degrees with the Highest Salary Potential” with mid-career wages between \$115,000 and \$121,000.
- ❖ The MSAE may also serve as a gateway to a doctorate degree.

CURRICULUM

The **innovative and immersive** curriculum of the MSAE program consists of required and elective courses offered on campus blended with elective online classes. Our high-touch online courses are taught by dedicated faculty using competency-based teaching methods that involve hands on exercises to help students gain practical knowledge of economics.

The MSAE can be completed in one year as an accelerated master's degree program, or in two or more years while you are employed.

On campus courses run during evening hours.

REQUIRED COURSES

Foundations of Quantitative Analysis
Applied Econometrics for Business and Policy
Advanced Applied Microeconomics
Advanced Applied Macroeconomics

SAMPLE ELECTIVE COURSES

Labor Economics
Economics of Health and Medical Care
Economic Impact and Evaluation: Methods and Practice
